

Coleford & Holcombe Magazine (deadline 15/11)

Coleford Climate Action are a new group in the village, preparing the community by adapting to the changing climate and the push to net-zero. Our big project for next year is a Green Open Homes event. We are looking for people in the parish who have already taken steps to improve the energy efficiency of their home. This may have included:

- Installed a heat pump
- Installed solar for electricity generation
- Installed solar for water heating
- Remodelled rooms for better efficiency
- Installed insulation or triple-glazing
- Draught proofing.

These could be turned into case studies to help others achieve similar results or in the future be part of Green Open Homes event in 2024.

Keep an eye out for other projects and to get involved at <https://www.facebook.com/groups/colefordclimateaction>
